

PREMIUM DEFENSE SERVICE

Our world is becoming more dangerous as outside threats, like ransomware, phishing, and cybercrime, are more rampant than ever. Plus, the greatest single threat to any organization remains the people who are using the systems. To combat these hazards, more must be done to protect your firm's environment. Because of this change to the threat landscape, Tabush Group is taking our security approach to the next level, ensuring comprehensive protection of both your systems and your users.

EDUCATION – Prepare users to anticipate cyber dangers they may face so they are prepared to take appropriate steps and prevent exposing your firm to unnecessary risks

CLOUD – Make your security elastic, extending the same high level of protection of your internal apps to all cloud services

PERIMETER – Continually scanning your firm's connections to the internet ensures any vulnerabilities are addressed

ENDPOINT PROTECTION – Enhances security for devices that access your network and ensures data security even if the device falls into the wrong hands

POLICY – Best practices to ensure data security and confidentiality while also simplifying third-party compliance

This increased cyber threat landscape means you now need additional security to anticipate and prevent security breaches. Protect your firm's most valuable assets before being confronted with one of these dangers. Tabush Group's Premium Defense Service includes:

- Multi-factor authentication (MFA) support and management
- User awareness testing and reporting
