FOR IMMEDIATE RELEASE

Boxtop by Tabush Group Named to TL NewsWire's Top 25 Products of 2016

New York, NY, December 29, 2016 – Tabush Group, a cloud computing, technology solutions, and IT services company, announced today that its Boxtop all-in-one cloud IT solution was recently voted among TL NewsWire's Top 25 Products of 2016. TL NewsWire, a weekly newsletter that discusses and links to hot new products and services of interest to legal professionals, reported on over 225 new products this year, 25 of which were selected by readers for this award.

Boxtop, which ranked #21 on the list, was created by Tabush Group to deliver all of a company's IT needs as a simple, secure, and scalable service, allowing the owners of small to midsize professional services firms to focus on growing their companies. Boxtop includes virtual desktops accessible securely from anywhere, at any time, on any kind of device, a fully managed cloud infrastructure network, storage, backups, security, and unlimited support.

"Our ace product reviewer Ed Zohn runs the products he evaluates in Boxtop to ensure fairness. 'Sure beats the old Citrix I used a decade ago,' he quipped in a recent email message," wrote TL NewsWire in announcing the award. "Boxtop provides everyone in your firm with a virtual Windows desktop. The wizards at Tabush Group help get all your legal and other software installed in this virtual environment, and can even provide you with thin client hardware that supports two monitors. Boxtop, which also runs on Macs and Windows PCs, supports Microsoft Office, PCLaw, Tabs3, Time Matters, Worldox, and other popular apps."

TL NewsWire is published by TechnoLawyer, a popular legal resource that produces a variety of free, critically-acclaimed email newsletters for lawyers and law office administrators that cover legal technology and law office management. Each news report on a new product in TL NewsWire contains a trackable link to that product's home page. The top products are determined by the number of clicks these links receive from the newsletter's subscribers.

"TL NewsWire subscribers chose the winners of these awards," wrote Neil Squillante, founder and publisher of TechnoLawyer. "When subscribers clicked for more details about a product we reported on, they passively cast a vote. Passive voting is the most meaningful type of voting for awards. The winners genuinely attracted the most interest from TL NewsWire subscribers."

"We are excited to be named to this list of top products," said Morris Tabush, Founder and President of Tabush Group. "We have worked hard at creating an innovative cloud IT solution that really fits the needs of small to midsize firms."
